

Young Warriors Curriculum (Ages 3–6)

Module: BREATH — Month 1

These scripts simplify the concepts from this module into playful, tangible games that young children can understand and enjoy. Ages 7–11 may use these scripts with slightly more mature framing. Ages 12+ use the standard adult scripts.

Script 1: Smell the Flower, Blow out the Candle

Goal: Teaching the difference between inhaling through the nose and exhaling through the mouth.

"Okay, Little Warriors! Sit like a frog with your legs crossed. Imagine you are holding a beautiful flower in one hand. (Model cupping a flower in one hand and have the student follow.) Take a big sniff with your nose to smell it! Sniff!

Now, imagine you have a birthday candle in the other hand. (Model by using index finger like a candle.) Blow it out! Whoosh!

Smell the flower... Sniff. Blow out the candle... Whoosh. One more time. Make the candle flicker! Good job!"

Script 2: Balloon Belly

Goal: Diaphragmatic (Belly) Breathing.

"Put your hands on your tummy. Imagine there is a big, colorful balloon inside your belly. When we breathe in, we want to fill the balloon up! Make your hands move out! Ready?

Breathe in... big tummy! Now, let all the air out of the balloon. Pshhh. Make your tummy flat.

Fill the balloon... big tummy! Pop the balloon... flat tummy! Can you do it without making a noise? Let's try."

Script 3: The Bumblebee Breath

Goal: Sensory feedback to calm the nervous system through vibration.

"Sit up tall. We are going to be bumblebees. We breathe in through our nose, but when we breathe out, we are going to hummmm like a bee. Close your mouth. Breathe in... Now hum! Hhmmmmmm. Feel your lips tickle? That is your bee power!

Let's make a whole hive of bees. Breathe in... Hhmmmmmm. One more, super quiet bee. Hmmm. Great focus!"

Instructor note for Ages 7–11: Rename to "Vibration Breath" to sound more mature.
